EDUCATION

Florida Institute of Technology - Melbourne, FL Aug 2024 - Present
B.S. in Astronomy & Astrophysics | Second Major: Planetary Science | Minor: Sustainability
GPA: 3.6 | Anticipated Graduation: 2027
Relevant Coursework: Observational Astronomy, Methods & Instrumentation for Astronomy, Deep Learning (CNNs & PyTorch), Classical Mechanics, Partial Differential Equations, Nanotechnology Lab

University of Oxford (Study Abroad) - Oxford, UK Jun 2025 - Aug 2025
Coursework: Differential Equations; Scientific & Technical Communication

TECHNICAL PROJECTS

Stellar Spectral Classification (Python, TensorFlow): Multi-task CNN that predicts Morgan-Keenan spectral letters from Pan-STARRS cutouts, with 84.3% top-1 and 98.4% top-2 accuracy on a 96,039-sample Gaia DR3 dataset.

Ortega Telescope Exposure Time Calculator (Python, JavaScript): Photometric calculator that solves exposure times from magnitude, signal-to-noise ratio, seeing, sky brightness, and airmass across five filters.

Drone Target Identification (Python, TensorFlow, YOLO, OpenCV): YOLO segmentation front end plus a multi-output CNN classifier, trained on 182,413 images, with 87.1% fine-class accuracy against a 23.5% baseline.

EXPERIENCE

AspireCURES - Melbourne, FL Aug 2025 - Present
Chief Technology Officer

- Direct all web development and technical operations for a private company that connects patients with rare white matter diseases to clinical trials, research studies, and genetic testing.
- Led the migration from Squarespace to Cloudflare Pages and maintain serverless patient registration, CRM-backed lead handoff, and a twice-weekly research feed across nine disease programs.

Sisters Hope Foundation - Melbourne, FL May 2025 - Present
Vice President of Database Management

- Manage and maintain the organization's patient database, overseeing structural updates and ongoing record management for a 501(c)(3) global nonprofit serving families affected by rare neurological disease.

Program Support Associate Jun 2024 - May 2025

- Maintained internal databases and streamlined data workflows, producing reports that supported program planning and evaluation.
- Led the integration and modernization of the patient database, earning promotion to Vice President of Database Management.

Intern Jun 2021 - Jun 2024

- Supported fundraising efforts, provided general technical support, and assisted with patient care and outreach.

SKILLS

Programming & Frameworks: Python, PyTorch, TensorFlow/Keras, HTML/CSS/JavaScript, Bash

Machine Learning: Deep Learning, Convolutional Neural Networks, Computer Vision, YOLO, OpenCV, Model Evaluation

Astronomy & Data Analysis: Observational Astronomy, Photometry, Telescope & CCD Instrumentation, Survey Catalogs (Gaia DR3, Pan-STARRS 1, WISE), Statistical Data Analysis

Laboratory Instrumentation: Transmission Electron Microscopy (TEM), Scanning Electron Microscopy (SEM), Atomic Force Microscopy (AFM), Scanning Tunneling Microscopy (STM)

Web & Data Infrastructure: Cloudflare Pages & Functions, Cloudflare KV, GitHub Actions, Zoho CRM, Database Administration, Database Design

Management & Operations: Project Management, Program Management, Operations Management, Board Governance
