PROFESSIONAL SUMMARY

Astronomy and astrophysics undergraduate at the Florida Institute of Technology pursuing a second major in Planetary Science and a minor in Sustainability. Strong foundation in scientific research, quantitative data analysis, and laboratory instrumentation, paired with technical communication skills developed through a study-abroad program at the University of Oxford. Proven leadership across nonprofit and technical roles, advancing from intern to Vice President at a rare-disease foundation and serving as Chief Technology Officer for an affiliated patient-matching web platform.

EDUCATION

Florida Institute of Technology - Melbourne, FL Aug 2024 – Present
B.S. in Astronomy & Astrophysics | Second Major: Planetary Science | Minor: Sustainability
GPA: 3.6 | Anticipated Graduation: 2027
Relevant Coursework: Methods & Instrumentation for Astronomy, Introduction to Python, Deep Learning, Nanotechnology Lab, Introduction to Aerospace Engineering, Economics

University of Oxford (Study Abroad) - Oxford, UK Summer 2025
Coursework: Differential Equations; Scientific & Technical Communication

Cedar Crest High School - Lebanon, PA Jun 2024
High School Diploma | GPA: 4.43 | SAT: 1460
Honors: Environmental Science Student of the Year, Honor Student Award, National Honor Society

EXPERIENCE

AspireCURES - Melbourne, FL Aug 2025 – Present
Chief Technology Officer

- Build and maintain the organization's patient-matching web platform that connects patients affected by rare white matter diseases with clinical trials, research studies, and genetic testing.
- Lead all web development and technical operations, overseeing site deployment, analytics, and disease-specific research content

Sisters Hope Foundation - Melbourne, FL May 2025 – Present
Vice President of Database Management

- Manage and maintain the organization's patient database, overseeing structural updates and ongoing record management for a 501(c)(3) global nonprofit serving families affected by rare neurological disease.
- Perform data entry and verification that safeguard the accuracy and integrity of patient records.

Program Support Associate Jun 2024 – May 2025

- Maintained internal databases and streamlined data workflows, producing reports that supported program planning and evaluation.
- Led the integration and modernization of the patient database, earning promotion to Vice President of Database Management.

Intern Jun 2021 – Jun 2024

- Supported fundraising efforts, provided general technical support, and assisted with patient care and outreach.

SKILLS

Programming & Data Analysis: Python, Statistical Data Analysis, Data Modeling, Data Entry
Database Management: Database Administration, Database Design, Customer Relationship Management (CRM), CRM Integration
Laboratory Instrumentation: Transmission Electron Microscopy (TEM), Scanning Electron Microscopy (SEM), Atomic Force Microscopy (AFM), Scanning Tunneling Microscopy (STM)
Scientific Disciplines: Observational Astronomy, Physics, Mathematics, Environmental Science, Scientific & Technical Communication
Management & Operations: Project Management, Program Management, Operations Management, Board Governance
